25X1 The following statistics give the actual output of the power plants, expressed in millions of watts, in the Province of Saxony in 1944, 25X1 and after war losses and dismantlings had occurred in 1945. The 25X1 figures for 1946 are estimates of production capacity after a 25X1 second dismantling had taken place. The percentages in the third 25X1 column are a computation of the estimated 1946 capacity compared 25X1 with the 1944 output.
